

Used milk cooling tank Model O-92

The Mueller tank is exclusively made of AISI 304 quality stainless steel (DIN-1.4301) and complies with the ISO 5708 standard for milk cooling tanks. In addition, the tank is superbly made (welded seamless) and polished. The heavy beam profile and adjustable legs ensure a uniform weight distribution, so that the tank can be placed in almost every bulk milk tank room. A fixed solid stainless ladder is fitted to the tank from model O-700 upwards.

The O-92 model includes the following features:

- Cleaning water level control.
- Deep-cool switch.
- Automatic cool start.
- Digital temperature indication.
- Fitted ladder from model O-700 upwards.
- Dipstick.
- Calibration card.

CIRCULATION CLEANING SYSTEM (CRS)

The circulation cleaning system was developed in the early 1990s. This fully-automated cleaning system (based on circulation cleaning) is mounted on the front side of the O-model.

QUICK CLEANING SYSTEM (VRS)

The cleaning system was further developed into a quick-wash cleaning system at the end of the 1990s. This quick wash or displacement cleaning system has major advantages compared to the circulation cleaning system:

- more economical (about 35% water saving).
- quicker (about 50% less cleaning time).
- environmentally friendly (less water and electricity consumption).

Dimension (mm)

Model	Maximum capacity in Litres	Length (B)	Width (C)	Height (A) incl. Spray Pipe horizontally measured	Height (A1) incl. agitator horizontally measured
OC 400	1.725	2020	1530	1250	1530
