Characteristics

- Direct acting
- Medium separated
- Long term performance capability
- Works from zero pressure
- Easy to assemble and service
- Low power consumption
- Any fitting position
- Minimised dead areas
- High operating safety through the use of high quality and 100% final testing of the products

Description

Direct acting 2/2 way solenoid valve with different orifice sizes for control of neutral gases and liquids. The plunger of the magnetic system is protected by spatial separation from the medium.

Valves of this design are single chamber valves with John Guest® push-fit connections. The coil system can be customised for common voltage and frequency ranges on request.

Electrical operating safety is achieved by insulation class F and can be supported by an integrated protective circuit.

Due to the use of high quality materials, the valve is applicable for high ambient and medium temperatures.

Highly suitable for using in laboratory and analysis equipment.

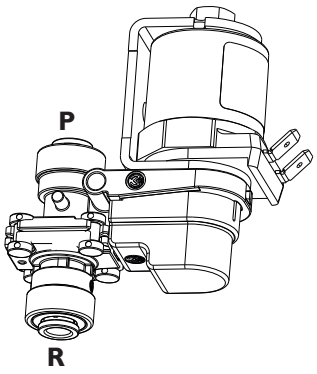

Applications

- Hot / cold drink dispensers
- Tank or boiler draining
- Medical engineering
- Industrial appliances
- Laboratory / analysis equipment
